# Imaging

# Leading the Way in Patient Care

**WE BELIEVE WHO'S USING OUR EQUIPMENT AND TECHNOLOGY IS EVERY BIT AS IMPORTANT AS HOW AND WHY IT'S BEING USED.**

From the moment Midmark entered the dental industry, helping advance patient care has been our passion. Today, our number one commitment is helping you and your team focus on what you do best — caring for your patients, from the operator to the mechanical room.

Midmark imaging solutions drive diagnostic accuracy, which in turn helps you deliver a successful treatment plan and bolster confident interactions with patients.

# Optimal Patient Care Begins With Quality Imaging

When you look for the factors that drive optimal patient care in your practice, consider the pivotal role of your imaging capabilities.

Clear, accessible images serve as powerful patient education tools for better compliance. And with lightning-fast results supported by digital image capture and connectivity, your patients don't have to wait, and neither do you. At the end of the day, diagnostic excellence brings peace of mind to both you and your patients, and it all begins with quality imaging.

# MIDMARK QUALITY HAS YOU COVERED EVERY STEP OF THE WAY

## EXPERIENCE IMAGE CLARITY

With innovative technology from Midmark, you can get flawless image clarity through our intraoral and extraoral imaging products to meet practice needs. Image clarity enables dentists to effectively and quickly make diagnoses and develop treatment plans. With chair-side viewing of X-rays, patients can quickly understand their diagnoses which builds confident doctor-patient interactions. Choose from a range of X-ray options including panoramic, cephalometric, intraoral and digital sensors. All Midmark imaging equipment uses state-of-the-art technology and integrates easily into most practice management software systems.

**OPERATORY WITH PREVA  
IMAGING UNIT**  
**Chair:** UltraComfort®  
**Stools:** Dentist's and assistant's stools  
**X-ray:** Wall-mounted Preva Plus,  
ClearVision CR Reader and imaging  
plate storage box.  
**Cabinetry:** Artizan® Expressions  
base treatment station, side cabinet,  
dispenser and upper storage

**COLORS**  
**Cabinet:** Silver Riftwood  
**Countertops:** Hazelnut Corian®  
Solid Surface  
**Upholstery:** Parrot Ultraleather®  
Limited Seams  
**Wall:** Argos SW7065  
**Floor:** Mannington™ Lakeview Adura™  
Max (Rapid)

# SOLUTIONS FOR DIAGNOSTIC EXCELLENCE

- 01 Optimal-dose settings are available to ensure patient safety and the sharpest images through the Vantage Digital Panoramic and Preva X-ray systems.
- 02 Midmark provides easy-to-use positioning tools, including panoramic remote support and training for your staff through Vantage Trust®.

- 03 Enjoy peace of mind with the Sensor Safe® extended care and replacement program to protect your ClearVision® sensor investment.

Easy to use tools for proper positioning are important to ensure the best image quality for diagnosis.

# Flexible Options for a Better Patient Experience

Our technology and equipment is designed to help ensure a safe and efficient environment that fosters the caregiver-patient interaction and is conducive to the delivery of high-quality care.

## SOLUTIONS FOR PRACTICE FLEXIBILITY AND EFFICIENCY

Digital integration for today or in the future is possible with the Preva systems which can incorporate a high-speed digital USB hub or come already integrated with our ClearVision® sensor based on your practice needs.

Patient comfort is maximized with the ClearVision sensor's thin profile and rounded corners. Available in two sizes to accommodate adults and children.

Upgrade as you grow with a cephalometric attachment as the needs of your practice change.

## OPTIONS TO FIT YOUR SPACE

We have options to fit your space with intraoral systems that include multiple arm lengths and fixed mounted or mobile options, and a CR reader with a small footprint that can fit where you need it.

**OPERATORY WITH PREVA PLUS IMAGING UNIT**  
**Chair:** UltraTrim®  
**Stools:** Dentist's and assistant's stools  
**X-ray:** Preva Plus mounted in central station  
**Cabinetry:** Artizan Expressions treatment station and central station

**COLORS**  
**Cabinet:** Prestige Walnut  
**Resin:** Mirage Bronze  
**Countertops:** Canyon Corian® Solid Surface  
**Upholstery:** Dusk Ultraleather®  
**Wall:** Argos SW7065

# PRODUCTS DESIGNED TO WORK THE WAY YOU DO

## BETTER CARE HAPPENS BY DESIGN

Our workflow solutions focus on the operational and clinical aspects of work and patient flow, enabling your entire space to be designed around the caregiver-patient interaction. Midmark can help you create the right clinical work environment for advancing patient care and improving office efficiency.

**OPERATORY WITH MOBILE PREVA  
IMAGING UNIT**  
**Chair:** UltraTrim **Stool:** Dentist's stool  
**Unit:** Asepsis 21® left-right Delivery  
Unit, chair-mounted rear Assistant's Unit  
**Light:** Ceiling-mounted halogen  
**X-ray:** Preva Mobile, ClearVision CR  
Reader and plate storage box  
**Cabinetry:** Synthesis® treatment  
station, side cabinet and dispenser

**Countertops:** Lava Rock Corian® Solid  
Surface  
**Upholstery:** Dove Grey Ultraleather®  
**Wall:** Argos SW7065  
**Floor:** BerryAlloc® DreamClick Pro  
River Oak Greige

# SOLUTIONS FOR STREAMLINED WORKFLOW

- 01** Work faster and smarter with Progeny® Imaging Software to get you to a diagnosis more efficiently so you can get back to your patient. Standard with all Midmark imaging equipment.
- 02** Intuitive interfaces are built into the Preva, ClearVision® CR and Vantage Digital Panoramic systems making them easy to operate.

- 03** Patient-side viewing on your monitor is easy with crisply detailed digital images providing improved patient engagement and efficient patient flow.
- 04** Preprogrammable exam settings on the Preva and Progeny Vantage Digital Panoramic systems are designed to improve the way you work by minimizing exam setup time.

# Things to Consider

What’s important to you? We’re not just asking about radiographic techniques. How do you want to practice? It’s a good idea to begin thinking about what imaging capabilities you want and need to be effective and make your delivery of care more efficient. Based on years of observing the clinical space, we have one basic recommendation: Design not just for how your clinic works today, but how you want to work in it and the environment you want to create for the future.

## FIRST THINGS FIRST

Grab a pen and answer these initial questions:

1. What do you like about your current imaging equipment?
2. What do you want your imaging equipment to be able to do that it cannot do today?
3. What aspects of your current imaging equipment do not allow you or your staff to work efficiently?
4. What do you want your clinical space to convey to your patients about you, and how does their experience of your imaging capabilities fit into that?

With 1 being the highest and 7 being the lowest, rank in order the importance of the following when considering your future imaging center design.

\_\_\_\_\_ Durability and longevity

\_\_\_\_\_ Patient comfort

\_\_\_\_\_ Technology integration

\_\_\_\_\_ Image clarity

\_\_\_\_\_ Aesthetics

\_\_\_\_\_ Efficient patient flow

\_\_\_\_\_ Cost effectiveness

## NEXT STEPS

Now, go back through the solutions we show on pages 6-15. Mark the features that appeal to you. What do you like about each one?

Midmark Quality has You Covered Every Step of the Way	Flexible Options for a Better Patient Experience	Products Designed to Work the Way You Do

## A LITTLE MORE DETAIL

1. What type of dentistry do you practice?  

☐ General Practice

☐ Orthodontics

☐ Oral Surgery

☐ Endodontics

☐ Pedodontics

☐ Prostodontics

☐ Specialty

☐ Other
2. What type of room design concept do you prefer?  

☐ Closed Room

☐ Open
3. If closed room, how many entries?  

☐ One

☐ Two
4. Do you have future expansion plans for your practice?  

☐ Now

☐ 1-2 Years

☐ 3+ Years
5. What will be the size of your future operatories?  

(Ideal size is 10’ W x 12’ D x 9’ H)

Depth:

Width:

6. What is the size of your extraoral imaging room?  
Depth:   
Width:

7. Where are sensors and imaging accessories stored?  

☐ Sterilization area

☐ Operatories

☐ Other

8. Where do you want your intraoral X-ray mounted?  

☐ Wall

☐ Cabinet

☐ Mobile

9. Will there be monitors and CPUs in each operator?  

☐ Yes

☐ No

If so, what will they be used for?  

☐ Patient Education

☐ Entertainment

10. Do you plan to have any hygiene-specific rooms?  

☐ Yes

☐ No

11. Will you require imaging capabilities in your treatment rooms?  

☐ Yes

☐ No

12. What types of ancillary equipment do you use in your operatories?

13. Are there any other specialty carts or equipment your operator needs to accommodate?

# Products and Solutions

*"We recently tested out a (ClearVision) dental sensor. We did not have any plans to purchase one but wanted to see what our choices were when we needed new sensors in the future. After about a week of using it, we did not want to give it back! We take multiple full mouth series every day. We used to have to use two sizes of sensors for every FMX. We can take any image we need on just the one (ClearVision) sensor due to its angled corners. My staff loves not having to change sensor sizes! The image quality speaks for itself. Our previous sensor had grainy images that were never easy to read. I took a bitewing series on the (ClearVision) sensor after getting an unclear image on the [competitor] sensor. There was no doubt about caries detection on the (ClearVision). **I highly recommend you try one for a couple weeks if you want clearer images with fewer sensors that will be more comfortable to the patients.**"*

**Michele M. Mills, DMD**  
Mills & Shannon Dentistry

# Intraoral X-ray

The Preva is the imaging workhorse of the dental office, used to detect cavities or other problem areas. With exceptional image quality and proven mechanics, Preva units are a pleasure to operate with effortless movement and drift-free positioning. Preva offers a powerful combination of features designed to provide maximal flexibility, razor-sharp images and years of productivity. Midmark Preva intraoral X-ray systems use a high-frequency direct current (DC) method of image capture in a range of solutions for your practice needs.

**Intraoral DC X-ray System adds superior technology to the most common X-ray unit used by dental practitioners, to:**

- Identify cavities and visualize tooth roots
- Examine the status of developing teeth
- Monitor the overall health of the bony area surrounding the tooth

## PREVA – FLAWLESS IMAGING AND ENHANCED WORKFLOW

- 01 The easy-to-use LCD control panel helps to identify target tooth, receptor type and patient size while also offering pre-programmed technique settings.
- 02 The Preva system is designed for effortless movement and fast one-handed positioning.
- 03 Preva provides a 0.4 mm focal spot for sharp, well-defined details that allow easy identification of pathology with both film and digital sensors.
- 04 The proprietary dual-arm braking system helps the head stay exactly where you position it without sagging or drifting.

# TAKE DIGITAL IMAGING TO THE NEXT LEVEL

**01** The Preva Plus is configured with all the features of the Preva DC and 2.0, plus integration with our ClearVision digital sensor, and built-in storage to keep sensors from being damaged or misplaced.

**02** Grow with the Preva 2.0 that gives you a high-speed USB connector so you can go digital when your practice is ready.

# CHOOSE THE OPTION THAT WORKS FOR YOUR PRACTICE

All Preva models are available in multiple mounting configurations to best suit your operatory needs: mobile, cabinet or wall.

# Digital Sensors

ClearVision is the digital sensor system from Midmark, designed to simplify practice integration and deliver high-quality images in a durable, patient-friendly design. Featuring a direct USB 2.0 connection, advanced CMOS technology optimizes resolution while reducing noise, producing sharp, detailed images for immediate review and diagnosis.

**PATIENT COMFORT**  
ClearVision sensor's thin profile, rounded corners, and contoured surfaces are designed to minimize patient discomfort commonly found with square or clipped edges. Available in two sizes to best accommodate patient needs.

**BETTER PRACTICE INTEGRATION**  
In the digital age, integration is essential to all you do. ClearVision is designed specifically to make imaging easier and more efficient for your busy practice by integrating with our Preva 2.0 and Preva plus intraoral X-rays through a direct USB hub.

**IMAGE CLARITY**  
Advanced CMOS technology optimizes resolution while reducing noise, producing sharp, detailed images for immediate review and diagnosis. ClearVision sensors are compatible with leading practice management systems.

**QUALITY AND DEPENDABILITY**  
Our sensor housing and cable are designed for reliability, water-tight connection, and to allow for repeated immersion in disinfectants to promote asepsis. For added durability, Kevlar® strands are integrated to reinforce the cabling for a thin, flexible cable you can rely on.

**PEACE OF MIND**  
All ClearVision sensors come with a standard two-year manufacturer's warranty covering failure or malfunction due to normal uses and our exclusive Sensor Safe® extended care and priority replacement plan for years one through five. Contact Midmark Customer Experience for the Sensor Safe extended-care plan details.

# Digital Reader

With its small footprint and elegant design, the ClearVision CR Digital Reader easily fits into even the smallest dental offices and exam rooms. Familiar workflow, and accessories comparable to those for film, allow for seamless integration into your practice.

### EFFORTLESS OPERATION

The automated, magnetized feeding tray offers push-and-go functionality, making it effortless to operate and an ideal imaging solution for computed radiography.

### LCD DISPLAY

A clear LCD screen intuitively guides users through unit operation and offers image previews. Provides device activity status and auto-sleep/auto-start options to conserve energy.

### THIN, FLEXIBLE AND REUSABLE IMAGING PLATES

A full range of reusable plates, including size 4C, are standard. Imaging plates offer 100% active area.

# Imaging Software

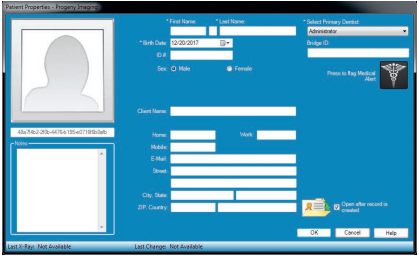

Progeny Imaging Software supports image acquisition, diagnosis and image handling. Magnification, contrast or density adjustment, and annotation are just a few of the powerful tools provided. Images can be exported, emailed or printed for insurers, your patients or referrals.

### IMAGING CAPTURE MADE SIMPLE:

- Superb image quality
- Powerful, no-hassle software
- Intuitive and logical interface
- Simplified acquisition
- DICOM-formatted images
- Data backup and restore functions
- 22 practical and useful tools
- Create your own custom templates
- Bridges with most major practice management programs and stores any digital image

Progeny Clarity™ and Progeny Clarity™ Plus reduce ghosting and overlapping of bony tissue, define edges, and enhance slight differences in tissue density for more accurate diagnoses.

Improve clinical workflow by using patient records to easily associate X-ray images and other related files to the patient, all in one place.

# Extraoral Digital Panoramic X-ray System

## EXPLORE EFFORTLESS WORKFLOW AND EASE OF USE WITH THE PROGENY VANTAGE 2D PANORAMIC SYSTEM

Extraoral X-rays let you keep track of growth and development, examine the bones of the face and relationship between teeth and jaws, and show the status of impacted teeth. Experience the ease of use and improved patient comfort with the Progeny Vantage Digital Panoramic System, designed to improve the way you work. With an integrated Microsoft Windows®-based computer, Vantage lets you set up exams and deliver diagnostic images chairside, giving you more time with the patient for positioning and image review. The Progeny Vantage Panoramic System delivers the features necessary to support efficient imaging workflow in your practice and improve patient care.

**Extraoral X-ray is an essential diagnostic tool for dentists, orthodontists and oral surgeons:**

- TMJ diagnosis and treatment planning
- Diagnosis of impacted wisdom teeth and treatment planning
- Screening for the placement of dental implants
- Orthodontic assessment
- Diagnosis of developmental anomalies
- Assessment of periodontal bone loss
- Visualization of periapical involvement
- General cancer screening of the jaw
- Full mouth view to identify sources of dental pain

THE VANTAGE PANORAMIC SYSTEM PROVIDES EASY OPERATION, IMAGE CLARITY AND ENHANCED WORKFLOW FOR A FAST AND ACCURATE DIAGNOSIS.

01 EASY TO USE

Five pre-programmed exam settings, including pediatric, bitewing and TMJ, minimize exam set-up time and allow routine diagnostic exams to be performed.

The easy-to-use, tablet-like Vantage Touch® operator panel provides exam selections, technique factors and a sample exam image with a simple touch or swipe.

The image is immediately captured on the Vantage Touch display for a quick assessment before releasing the patient.

02 IMPROVED WORKFLOW

Open, compact design optimizes space requirements, allows for face to face patient positioning and is ceph upgradeable for expanded exam capabilities.

Industry-standard TWAIN digital imaging interface ensures compatibility with many practice

management software systems, for seamless digital connectivity and maximum efficiency.

03 BUILT IN POSITION TOOLS AND TRAINING

Alignment tools are easy to use, facilitating patient positioning for a quality panoramic image.

Vantage comes with control buttons for column height, a patient positioning table with chin rest, bite guide, and positioning wands. Plus a laser positioning system with Frankfort plane laser, mid-Sagittal laser, and Cuspid laser to accurately indicate the correct alignment points.

Positioning training for staff is offered for the first 60 days at no charge through the exclusive Vantage Trust remote support and training service. For convenience, videos can be easily accessed right from the Vantage Touch operator panel. See pages 32-33 for more information.

Adult Panoramic

Pediatric Panoramic

Bitewing

TMJ

04 IMAGE CLARITY

3-Motion Technology For Superior Image Quality

With multi-dimensional arm movements, 3-motion technology provides the proper imaging geometry needed to capture undistorted panoramic images and diagnostic bitewing X-rays with open contacts. This provides access to more exam types and superior image quality over other X-ray models for better diagnostics and an enhanced patient experience.

**Progeny Clarity** Enhanced filter set and automatic spinal compensation provide superior diagnostic imaging quality for accurate diagnosis.

# Cephalometric System

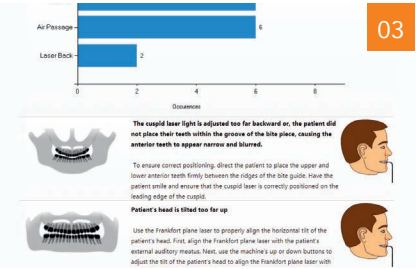

## EXCEPTIONAL IMAGING, EXCEPTIONAL FEATURES

A cephalometric system allows viewing teeth in relation to the jaw and the patient’s profile for the ideal orthodontic planning and treatment. The Progeny Vantage C can be fitted with two dedicated sensors—one panoramic, one cephalometric—for optimal examination efficiency. Or select one sensor to use for both functions, knowing you can add a second sensor in the future. Enhanced by the exclusive Clarity Enhanced Imaging Filter Set, Vantage C provides the soft tissue visualization for the detailed patient profiles you need to identify the bony and soft tissue landmarks. These critical points of reference are essential for accurate measurement in orthodontic patient treatment care planning.

## FEATURES

- 01 Easy-to-use cephalostat can be installed either left or right
- 02 Cephalostat, ear posts and nasion positioner ensure accurate positioning
- 03 Includes Vantage Trust remote training and positioning assistance
- 04 Vantage Touch interactive operator panel is easy to use
- 05 Award-winning open design improves patient comfort
- 06 Slit-scan collimation reduces scatter radiation, improving image visualization

# Panoramic Positioning Support

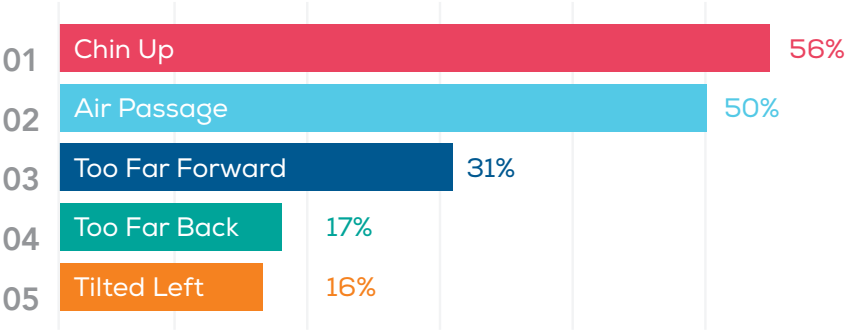

Vantage Trust offers exclusive remote support and positioning training for panoramic system users, available only for the Progeny Vantage Digital Panoramic System.

Pre-installed software and automatic forwarding of images to Vantage Trust for feedback make it easy to use, with summary data, images and patient positioning reports readily available at [progenyvantagetrust.com](http://progenyvantagetrust.com). Help your staff make the most of your panoramic imaging investment, while providing them with responsive training and feedback they can really use.

Vantage Trust sample reports

## VANTAGE TRUST TOP 5 POSITIONING ERRORS AND CORRECTIONS

These figures and examples are derived from analysis of 2,914 customer reports created by the Vantage Trust service from 2011 to 2017.

**ERROR:** Chin tilted up  
**CORRECTION:** Adjust the tilt of the patient's head

**ERROR:** Air passage is open  
**CORRECTION:** Swallow, place tongue to the roof of the mouth, and hold breath

**ERROR:** Too far forward  
**CORRECTION:** Place the upper and lower anterior teeth firmly between the ridges of the bite guide

**ERROR:** Too far back  
**CORRECTION:** Place the upper and lower anterior teeth firmly between the ridges of the bite guide

**ERROR:** Tilted to the left  
**CORRECTION:** Proper placement is derived by bringing the nasal bridge to the marker and continuing down to align the middle of the central incisors

# What You Get With Midmark

## ENRICHING THE POINT-OF-CARE EXPERIENCE

When you choose Midmark, you get so much more than a product. You get a partner with decades of hands-on manufacturing expertise, inspired design innovation, and landmark thought leadership in workflow efficiency. Midmark continues its long tradition of improving patient care by infusing function-forward design, relentless quality and thoughtful technology into every product. And with an extensive warranty and dedicated technical support, we're right by your side the moment you need us.

## WARRANTY AND SERVICE

We stand by the quality and reliability of our products. That is why we offer a standard three-year limited warranty on the Vantage Panoramic and a two-year limited warranty for all other imaging products purchased through an authorized Midmark dealer. ClearVision sensors come with an extended care plan and replacement priority shipping for five years for failure or malfunction. In addition to warranty, Midmark has dedicated Imaging Specialists to offer support in intraoral and extraoral imaging products and trends. Working in conjunction with Midmark Customer Experience and Technical Service teams, you can be assured you have the full support you need for product questions, from installation to maintenance and service.

## IMAGING EXPERTISE

We stand behind every Midmark product we sell, ready to support you with a team of experts in imaging technology. Our highly trained Imaging Specialists and U.S.-based customer service and support are renowned among end-users and dealers alike, giving you the confidence you need to equip your practice for success with no second thoughts. When you buy Midmark, you get more than products; you get a partner.
