RODIN™ TITAN **NEW!**

Ceramic Nanohybrid Resin

Rodin™ Titan is Pac-Dent's latest ceramic nanohybrid resin designed for printing long-term full arch restorations and provisional hybrid dentures. Rodin™ Titan preserves the core composition of Rodin™ Sculpture – a class II ceramic nanohybrid with analogous ceramic filler content, but now features a substantially increased flexibility for enhanced impact strength.

Benefits & Features

		
Improved Flexibility	Unmatched Strength	Improved Aesthetics
		
Optimal Durability And Toughness	Lifelike Incisal Translucency	FDA 510K/Health Canada/TGA Cleared
		
		Vita Classic Shades System Matching

APPLICATIONS

Rodin Titan	Rodin Sculpture	Rodin Sculpture 2.0
<ul style="list-style-type: none"> Recommended for Flexibility For high impact prosthetic indications: (All on Xs, screw retained dentures, full arch denture teeth) Improved Flexibility: Rodin™ Titan features a significantly reduced flexural modulus, providing exceptionally high impact strength Rodin Titan features analogous ceramic filler content to Rodin Sculpture Class II Ceramic Nanohybrid 	<ul style="list-style-type: none"> Recommended for Aesthetics For single crowns, inlays, onlays, and veneers, denture tooth arches, all-on-x provisionals Rodin™ Sculpture features a Biaxial Flexural Strength of 175 MPa, and a Flexural Modulus of 6500 MPa Rodin Sculpture consists of over 50% ceramic filler content Class II Ceramic Nanohybrid 	<ul style="list-style-type: none"> Recommended for Strength For temporary and permanent fixed restorations Improved Strength: Rodin™ Sculpture 2.0 boasts an impressive Biaxial Flexural Strength of 200 MPa Sculpture 2.0 now consists of over 60% ceramic filler content, providing a substantial increase in strength and superior X-ray radiopacity Class II Zirconia-Infused Ceramic Nanohybrid

RODIN™ SCULPTURE 2.0 **NEW!**

Zirconia Nanohybrid Resin

Rodin™ Sculpture 2.0 is the next monumental evolution of Pac-Dent's crown and bridge material. This zirconia-infused nanohybrid has been engineered to transcend the standards of permanent dental restorations. This next-generation resin achieves previously unseen levels of flexural strength and ceramic filler content, redefining what can be achieved through 3D printed restorations.

Benefits & Features

Unmatched Strength

Best in Class Radiopacity

Rodin™ PALETTE

Naturalizing Kit

Image provided by Andrew Priddy, CDT

Image provided by Archibald Digital

Introducing Rodin™ Palette Naturalizing Kit by Pac-Dent, an innovative light-curable staining system that uses advanced nano-technology chemistry inspired by Rodin Sculpture to guarantee a delamination-free bond. Offered in a wide range of colors and shades, Rodin Palette provides users with tools to replicate natural tooth and gingiva features. Enhancing both visual appeal and durability, it's ideal for long-term provisional and permanent 3D-printed restorations.

- Comprehensive color selection empowers users to precisely characterize and color match restorations and provisionals with stunning accuracy.
- Provides best-in-class wear resistance, ensuring long-lasting performance.
- Indicated for use with indirect and direct composite restorations and provisionals comprised of ceramic resin.
- Requires a Nitrogen Based Curing System for optimal results.
